NATIONAL DEFENSE BUDGET ESTIMATES - FY 1990/FY 1991

This document is prepared and distributed as a convenient reference source for the National Defense biennial budget estimates for FY 1990/FY 1991. It also provides several current and constant dollar historical time series for National Defense, the total federal budget, and the U.S. economy.

(COMPTROLLER)

STATISTICAL CHANGES IN THE PRESENTATION OF NATIONAL DEFENSE DATA

RETIRED PAY/ACCRUAL

For the years FY 1945-FY 1984, DoD budget authority and outlays show military retired pay on a cash basis. After FY 1984, DoD budget authority and outlays reflect accrual cost of military retirement. OMB has moved the actual military retired pay cash accounts from the DoD Military Functions (051) to Income Security Function (600) in both budget authority and outlays and replaced it with an imputed value for military retired pay accrual in the DoD Military Functions (051) in all years to provide for a comparable data series.

ADJUSTMENTS FOR RETIRED PAY ACCRUAL

The DoD Board of Actuaries updated the actuarial assumptions resulting in a reduction to the retired pay accrual normal cost percentage (NCP) for full-time and part-time personnel. The effect is a decrease of about \$2.5 billion annually beginning in FY 1990. This adjustment was treated as a price change and not a programmatic change and the military pay deflators have been adjusted accordingly.

FEDERAL EMPLOYEES' RETIREMENT SYSTEM (FERS)

The additional costs for retirement contributions due to enactment of the Federal Employees' Retirement System (FERS) Act of 1986, P.L. 99-335 are included as inflationary increases and the DoD deflators have been adjusted accordingly.

CHANGE IN ACCOUNT STRUCTURE

There have been several changes in the account structure within Function (050). Stockpile sales were moved from Function (054) to Function (051) and a new account, Maritime Administration which was added to Function (054) in the FY 1989 request has been transferred to the Transportation Function.

CHANGES IN SCOREKEEPING

Rescissions: In the past, rescissions of prior year unobligated balances were reflected as adjustments only against TOA in the applicable program year. However, in presenting the amended FY 1989 budget, the Congressional Budget Office (CBO) and Office of Management and Budget (OMB) directed scoring of such rescissions as reductions to current year Budget Authority. This scoring procedure continues and rescissions of unobligated balances are reflected in both FY 1988 and FY 1989 as a Budget Authority adjustment for those years.

Reappropriations: Reappropriations previously were scored as new Budget Authority in the year of legislation. However, in presenting the amended FY 1989 budget, CBO and OMB directed scoring of reappropriations as Budget Authority in the first year of new availability [first year after original availability would lapse]. This also continues and FY 1988 Budget Authority reflects this scoring adjustment.

CHAPTER 1

NATIONAL DEFENSE - AN OVERVIEW

This chapter provides an overview of the National Defense function of the federal budget which includes, in addition to the DoD budget, activities of other Federal Agencies that support our National Defense. Data are provided in three standard classifications: total obligational authority (TOA), budget authority (BA), and outlays as defined below.

Definitions

Budget Authority -- BA is the authority to enter into obligations for payment (outlays) of Government funds. Most BA is provided by Congress in the form of appropriations and reappropriations which can be increased or decreased by transfers to or from another account, and is identified to the year the authority takes effect.

Total Obligational Authority -- TOA is a DoD financial term which expresses the value of the DIRECT Defense program for a fiscal year.

Prior to FY 1979, TOA differed from BA primarily because of:

- (1) Congressional actions directing the transfer of prior year BA balances to finance direct programs (increasing TOA with no effect on BA);
- (2) Application of shelf stock sales receipts to finance direct programs (increasing TOA with no effect on BA); and
- (3) BA lapsing before obligations were incurred (decreasing TOA with no effect on BA).

Beginning in FY 1979, Congressionally-directed transfers of prior year BA balances which have the effect of extending the life of the appropriation are treated as both TOA and BA (The term "Reappropriation" applies when prior year balances are brought forward and the life of these funds is extended).

An additional difference is Net Offsetting and Trust Fund Receipts which are deducted from BA, but have no effect on TOA. These are collections from the public that arise out of the business-type or market-oriented activities of the Government and are deposited in receipt accounts.

Recently, the differences between BA & TOA have been greater than usual due to the Congressional decision to finance more programs with transfers, particularly in the Military Personnel accounts. The following table provides a reconciliation between BA and TOA for FY 1988, FY 1989, FY 1990, and FY 1991.

**TOA and BA Reconciliation for FY 1988, FY 1989, FY 1990, and FY 1991

| Total Budget Authority | 283,755 | 290,186 | 305,645 | 320,909 |

Outlays -- There is a time lag between budgeting funds (congressional appropriation), signing contracts and placing orders (obligations), receiving goods or services and making payments (liquidating obligations). Payments, termed outlays, lag obligations due to the time required to render services or complete projects. Under full funding, Congress approves, in the year of the request, sufficient funds to complete most procurement and construction programs, even though these projects may require several years to complete. As a result of full funding, and the time required to produce and deliver goods and services, outlays during a fiscal year may be for payment of obligations incurred during prior years as well as the current year. Outlay data reflect these spending patterns and also the changes in program mix over time.

Budget Summary

Table 1-1 presents the budget request for the National Defense Function in the terms defined previously. The National Defense Budget includes, in addition to the DoD budget, those activities of the Departments of Energy and Treasury, the General Services Administration, Federal Emergency Management Agency, and the Selective Service System which support the National Defense Function. These activities are aggregated in Table 1-1 as DoE and other, and are shown in more detail in later tables. Data are provided in both current and constant FY 1990 prices.

Table 1-2 provides the National Defense BA estimate by Act in current prices.

Table 1-3 provides the National Defense BA estimate by Act in constant FY 1990 prices.

Table 1-4 provides the National Defense Outlays estimate by Act in current prices.

Table 1-5 provides the National Defense Outlays estimate by Act in constant FY 1990 prices.

Table 1-6 provides a reconciliation from the Defense Appropriation and Military Construction acts to National Defense BA and Outlays shown in the President's Budget request in both current and constant FY 1990 prices.

Table 1-7 provides the Long-Range forecast for the National Defense Function.

Table 1-8 provides BA for all functions of the total Federal Budget for fiscal years 1988 through 1994. The functions are those used in the Budget of the United States which is the source document for this table.

Table 1-9 provides Outlays for all functions of the total Federal Budget for fiscal years 1988 through 1994 in the same format as Table 1-8.

CHAPTER 2
CONTINGENCY ESTIMATES AND
DOD BUDGET REQUEST BY APPROPRIATION ACT
FY 1990/FY 1991 BIENNIAL BUDGET

Table 2-1 reflects Budget Authority and Outlays associated with contingency estimates for the National Defense function in the FY 1990/FY 1991 biennial budget request. The contingency estimates are contained only in the Defense Appropriations Act. They represent the Administration's proposed legislation to support several military initiatives.

Table 2-2 is a summary of the total Department of Defense Budget Authority and Outlay estimates for the FY 1990/FY 1991 biennial budget request as submitted to the Congress in January 1989. The estimates are identified by the Defense Appropriation Act and the Military Construction/Family Housing Act.

COMPOSITION OF 1991 B/A & OUTLAYS

CHAPTER 3

LEGISLATIVE AUTHORIZATIONS

Almost all National Defense activities are within the legislative purview of the Armed Services Committees (ASC) of the House and Senate. Practically all National Defense budget authority is subject to the annual appropriation process. The Department of Defense budget authority accounts for 97% of the National Defense function in both FY 1990 and FY 1991. The Defense Appropriation Act itself is 94% of the total National Defense request in both FY 1990 and FY 1991. The remainder of the estimates is scattered under several other headings and bills.

Tables 3-1a and 3-1b present the FY 1990 and FY 1991 National Defense estimates for those accounts requiring annual legislative authorizations. As shown, \$232 billion in FY 1990 and \$246 billion in FY 1991 are subject to specific annual authorization of the amounts to be appropriated. Another \$80 billion in FY 1990 and \$82 billion in FY 1991 are covered by the authorization of military end strengths (active and reserve); however, the military personnel appropriation dollars are not subject to specific authorization legislation.

Table 3-2 presents a summary of the authorizations enacted by appropriation title for FY 1988 and FY 1989, and the authorizations requested for FY 1990 and FY 1991.

Table 3-3 presents various categories of personnel authorizations enacted for FY 1988 and FY 1989, as well as the FY 1990 and FY 1991 biennial request for DoD. In accordance with Congressional direction in FY 1987, Selected Reserves are end strengths rather than average strengths, as were used previously.

Table 3-4 presents budget authority for the appropriations covered by the Defense Authorization Bill. The FY 1988 and FY 1989 columns show actual amounts authorized and appropriated. The FY 1990 and FY 1991 columns show the biennial authorization requests now pending.

Table 3-5 presents a reconciliation of authorization (both DoD and Military Construction Bills) to the total Department of Defense budget authority for the FY 1990 and FY 1991 biennial request.

FISCAL YEARS

CHAPTER 4

CHRONOLOGIES

The matter of chronologies has assumed much greater importance because of the scorekeeping provisions of the Congressional Budget and Impoundment Act.

Table 4-1 provides a chronology of National Defense budget authority for FY 1988 column of the FY 1988/FY 1989 biennial budget estimates submitted to Congress in January 1987. Congressional actions and other changes in calendar year 1987 are shown to arrive at the FY 1988 column of the Amended FY 1989 budget. Other changes in calendar year 1988 are shown to arrive at the final FY 1988 column of the FY 1990/FY 1991 biennial budget.

Table 4-2 provides the same chronology for FY 1988 outlays.

Table 4-3 provides a chronology of National Defense budget authority for the FY 1989 column of the FY 1988/FY 1989 biennial budget estimates submitted to Congress in January 1987. The Budget Summit Agreement reductions of November 1987 are reflected, which lead to the Amended FY 1989 budget submitted in February 1988. Subsequent Congressional actions and other changes in calendar year 1988 are shown to arrive at the FY 1989 column of the FY 1990/FY 1991 biennial budget.

Table 4-4 provides the same chronology for FY 1989 outlays.

Table 4-5 provides the initial National Defense budget authority requested in the FY 1990 and FY 1991 biennial estimates as submitted to Congress in January 1989.

Table 4-6 provides the same chronology for FY 1990 and FY 1991 outlays.

Table 4-7 provides a detailed chronology of Department of Defense Total Obligational Authority (TOA), Budget Authority (BA), Appropriations and Outlays for FY 1988, beginning with the initial estimates through final data.

Table 4-8 provides comparable chronology data for FY 1989, beginning with the initial budget estimates through the current year column of the FY 1990/FY 1991 biennial budget.

Table 4-9 provides comparable data for the initial FY 1990 and FY 1991 biennial budget estimates.

CHAPTER 5

PAY RAISES, PRICE INCREASES, AND TREATMENT OF INFLATION

I. Definitions

1. Inflation

Inflation is an increase in the general level of prices in the economy. Inflation does not mean that prices rise evenly or that all prices are rising. Some prices may be constant and others actually may be falling. Prices of some commodities rise faster than others because of differences in the magnitude and direction of changes in supply and demand in various markets. There are many different measures of inflation:

a. GNP Implicit Price Deflator

The **Gross National Product (GNP) implicit price deflator**, generally regarded as the best single measure of broad price movements in the economy, is the ratio of GNP in current prices to GNP in constant prices.

b. Consumer Price Index

The **Consumer Price Index (CPI)** measures the average change in the prices of a fixed list of goods and services purchased by families and individuals in urban areas across the country. Although it is often called the "Cost-of-Living Index" it measures only price changes, just one of several factors affecting living costs.

c. DoD Purchase Index

The **DoD Purchase Index** developed by OASD(C) consists of outyear projections based upon fiscal guidance from OMB linked to actual DoD purchase price experience calculated by the Commerce Department's Bureau of Economic Analysis (BEA).

2. Base Year

The **Base Year** is a point of reference representing a fixed price level, and is expressed as 1.00 (e.g., FY 1989 = 1.00). The base year for a set of index numbers can be changed to another year by dividing each index number by the index for the desired base year.

3. Aggregate Price

The **Aggregate Price** is a weighted average of individual prices, where each price is weighted by an item's contribution to total expenditures. The aggregate price is thus a notional price developed to measure changes in inflation and is greatly

affected by the relative mix of the items considered, and the change of that mix over time.

4. Annual Rate of Change in Prices

The **Annual Rate of Change** measures the year-to-year change in prices, computed by dividing one year's aggregate price by the preceding year's aggregate price.

5. Index

The **Index** is a time series which measures the change in prices from a fixed point in time, and is calculated by setting the base year equal to one, and then multiplying the index value of each year by one plus the annual rate of change of the next year.

6. Current Dollars

An item or service is priced in **Current Dollars** if the prices contain all inflationary increases expected to occur in a program over the duration of the spendout of an appropriation. Current dollars are also called "then year" dollars, "budget" dollars or "fully inflated" dollars.

7. Constant Dollars

Constant Dollars measure the value of purchased goods and services at price levels which are the same as the base or reference year. Constant dollars do not contain any adjustments for inflationary changes that have occurred or are forecast to occur outside the base year.

8. Real Growth

Real Program Growth - the year-to-year change in constant dollars - is usually expressed as a percentage, and is computed by dividing the constant dollars for one year by the constant dollars of the previous year and subtracting one. Real growth always implies a relationship between two or more time periods.

9. Spendout Rates

Spendout Rates (also called outlay or expenditure rates) are the expected cash flow for a given appropriation expressed as the percent expected to be spent in a given year. These rates are appropriation unique and range from two years in the pay accounts to as much as ten years in ship construction.

10. Outlays Index

An **Outlay Index** measures the impact of changes in inflation on outlays; is used to convert outlays from current to constant dollars; is used to compute the amount of inflation to be added

to a base price; and is used to reprice estimates when inflation assumptions are revised. An index for outlays is calculated by compounding annual rates from any base year.

11. TOA Index

A TOA Index measures the impact of changes in inflation on TOA, given a specific fiscal year and phasing of work performed (or outlays), and is usually developed using the standard outlay rates for an appropriation. The TOA index measures the budgeted change of inflation from a fixed point.

II. TABLES

Table 5-1 Provides inflation indices in base year FY 1990 for selected economy-wide measures from 1945-1994. These indices are provided for a comparison of DoD inflation with inflation in the general economy.

Table 5-2 Provides pay and inflation assumptions used in the FY 1990/FY 1991 biennial budget for DoD outlays. The FY 1988 rates are actual rates, and the rates for FY 1989-FY 1994 are based on OMB guidance projected at the GNP rate. The historical inflation rates for fuel are based on the change in the cost per gallon paid by the customer to the stock fund while the outyear forecasts of fuel increases are based on the Administration's estimate of RAC costs. Inflation estimates for all other purchases are in line with the GNP deflator. The composite pay deflator reflects adjustments to treat both the additional FERS cost and reductions in retired pay accrual which resulted from actuarial revisions in the normal cost percentage as a price increases.

Table 5-3 Provides pay and inflation assumptions used in the FY 1990/FY 1991 biennial budget for DoD BA. The pay raises are annual rates and the same as Table 5-2. The purchases rates are based on the annual outlay rates in Table 5-2 converted to BA using the most recently published spendout profiles.

Table 5-4 Provides inflation indices in base year FY 1990 for each DoD appropriation title to be used in converting TOA from current to constant FY 1990 dollars.

Table 5-5 Provides inflation indices in base year FY 1990 to be used in converting pay and purchases TOA from current to constant FY 1990 dollars.

Table 5-6 Provides inflation indices in base year FY 1990 for each DoD appropriation title to be used in converting BA from current to constant FY 1990 dollars.

Table 5-7 Provides inflation indices in base year FY 1990 to be used in converting pay and purchases BA from current to constant FY 1990 dollars.

Table 5-8 Provides inflation indices in base year FY 1990 for each DoD appropriation title to be used in converting outlays from current to constant FY 1990 dollars.

Table 5-9 Provides inflation indices in base year FY 1990 to be used in converting pay and purchases outlays from current to constant FY 1990 dollars.

Table 5-10 Provides a chronology of inflation estimates since February 1975. This table shows that the estimated inflation rate for a given year is revised many times before it becomes actual.

Table 5-11 Provides outlay rates to be used in developing outyear inflation factors for projecting future costs. These rates differ from those used to forecast outlay estimates from BA in that they do not allow for lapses in the accounts and they only reflect the purchases spending profile, excluding fuel. The rates used to estimate outlays from BA levels reflect spending patterns of the total account, including pay and fuel.

Table 5-12 Provides military and civilian [general schedule] pay increases from 1945 to the pay raises assumed in the FY 1990/FY 1991 biennial budget request.

Table 5-13 Provides pay indices in base year FY 1990 for each component of civilian pay in DoD. Separate rates are maintained for general schedule [GS], wage board [WB], direct hire foreign national [DHFN], and indirect hire of foreign national [IHFN].

Defense as a Share of Federal Outlays

CHAPTER 6

TOA, B / A, AND OUTLAY TRENDS AND PROGRAM CHANGES

Table 6-1 through Table 6-3 and Table 6-8 through Table 6-13 are historical series and provide summaries typically used in analyzing trends in defense programs.

Table 6-1 provides a TOA summary by appropriation title from FY 1953-FY 1991 in both current and constant FY 1990 dollars.

Table 6-2 provides a TOA summary by pay, non-pay operations, and investment costs from FY 1953-FY 1991 in both current and constant FY 1990 dollars. This summary is especially useful since the investment program and the non-pay operations are identified on separate lines.

Table 6-3 provides a TOA summary by component from FY 1953-FY 1991 in both current and constant FY 1990 dollars. The Defense-wide total includes those items in the budget not identified to a specific component such as Retired Pay, Defense (until FY 1984); Contingencies, Defense; and Claims, Defense. Beginning in FY 1983, Family Housing costs are allocated to the Military Departments, and in FY 1985, the military retired pay costs were budgeted by the Services in their Military Personnel accounts.

Table 6-4 provides TOA by major force program in current dollars.

Table 6-5 provides TOA by major force program in constant FY 1990 dollars.

Table 6-6 provides appropriation summaries in current dollars for TOA, BA and outlays.

Table 6-7 provides appropriation summaries in constant FY 1990 dollars for TOA, BA and outlays.

Table 6-8 provides a Budget Authority summary by appropriation title from FY 1953-FY 1991 in both current and constant FY 1990 dollars.

Table 6-9 provides a Budget Authority summary by pay, non-pay operations, and investment costs from FY 1953-FY 1991 in both current and constant FY 1990 dollars.

Table 6-10 provides a Budget Authority summary by component from FY 1953-FY 1991 in both current and constant FY 1990 dollars.

Table 6-11 provides an Outlay summary by appropriation title from FY 1953-FY 1991 in both current and constant FY 1990 dollars.

Table 6-12 provides an Outlay summary by pay, non-pay operations, and investment costs from FY 1953-FY 1991 in both current and constant FY 1990 dollars.

Table 6-13 provides an Outlay summary by component from FY 1953-FY 1991 in both current and constant FY 1990 dollars.

Table 6-14 provides the estimate of DoD Civilian pay in current dollars.

Table 6-15 provides the estimate of DoD Civilian pay in constant FY 1990 dollars.

Defense Outlays as a Share of GNP

CHAPTER 7

DEFENSE, THE PUBLIC SECTOR, AND THE ECONOMY

The National Defense Function shown in Tables 7-1 and 7-2 is consistent with the OMB treatment of military retirement in all years.

Table 7-1 provides total Federal outlays from FY 1945-FY 1991, grouped under: National Defense; Veterans, Space and International Programs; Net Interest; and Social and Economic programs. This category includes the following functions: General Science and Technology (excluding the space program); Natural Resources and Environment; Energy; Agriculture; Commerce and Housing Credit; Transportation; Community and Regional Development; Education, Training, Employment and Social Services; Health; Income Security; Administration of Justice; General Government; Revenue Sharing and general purpose fiscal assistance.

Table 7-2 provides these data in constant FY 1982 prices.

Table 7-3 provides a breakdown of net U.S. public spending by federal, state, and local components from FY 1945-FY 1991. This excludes government enterprises (such as the postal service, utilities, and liquor stores) except for any support these activities receive from tax funds.

Table 7-4 provides these data in constant FY 1982 prices.

Table 7-5 provides Gross National Product (GNP) for fiscal years 1947 through 1991 in current and constant FY 1982 dollars. The table provides a breakdown of GNP under these headings: National Defense, Other Federal, State and Local, and All Other. Data are on a National Income Accounts (NIA) basis. Also shown are percentage distributions of the NIA by fiscal years.

Table 7-6 provides DoD employment (military and civil service by component and industry employment) for the years 1940-1991.

Table 7-7 provides U.S. employment and labor force data for FY 1940-FY 1991.

Table 7-8 is a master percentage table which provides DoD and national defense spending as a percentage of various economic and budgetary aggregates. Included are: DoD and national defense outlays as a percentage of the Federal Budget and of net public spending; DoD employment as a percentage of public employment and the total labor force; and the defense share of GNP on a budget basis.

a/ Air Force civil service employment figures are not available separately prior to 1948. They are included in the Army figures for the earlier years.

b/ Civil service figures for 1953 and later years include foreign indirect hire employees.

c/ Navy reserve personnel on active duty for Training and Administration of Reserves (TARS) are included in the active Navy prior to FY 1980. From FY 1980 on, they are included in the Full-Time Guard and Reserve.
